Using Your Calling Features

Three-Way Calling

Three-Way Calling allows you to add a third party to a previously established connection. If either party hangs up after the conference, you are still connected to the remaining party.

To use your three-way calling service: Depress and release the hookswitch to put the original party on hold. Listen for three bursts of dial tone followed by a steady (normal) dial tone.

Dial the number of the third party. When this party answers you can talk privately. When you are ready to establish the conference connection, depress and release the hookswitch. If the third party does not answer or the line is busy, depress and release the hookswitch and you are reconnected to your original party.

When the originating party hangs up, all parties are disconnected and the call is completed.

*If you own a push button telephone, you may avoid the wait by depressing the (#) symbol which is located on the bottom right button.

Call Forwarding

Call Forwarding automatically forwards your calls to another location when you plan to be away from your telephone for an extended period of time or you do not wish to receive any calls. *If you own a push button telephone, you may avoid the wait by pressing the (#) symbol which is located on the bottom right button.

Direct Distance Dialing

With Direct Distance Dialing (DDD), you can dial your own station-to-station long distance calls. To make Direct Distance Dialing possible, the nation has been divided into more than 120 geographic areas. Each area has its own three-figure "Area Code." You probably can obtain the area code of the place you are calling by visiting pages 10 and 11 of this directory. You can also dial the operator and they will provide you with the area code you are wishing to obtain.

From telephones at all exchanges:

How to Dial

First get the correct number and the area code of the city you wish to call. Beginning July 21, 1995, you must dial 1 + area code + number for all long distance calls within or outside of the 618 area code. For example: To place a long distance telephone call, you would dial:

1 + 618 + 643-2500

1 + 815 + 283-4111

Beginning October 24, 2021, all local calls within our Co-op exchanges will require ten digit dialing. For example: To place a local telephone call within one of our seven exchanges, you would dial:

618 + 736-2211

How to Reach Directory Assistance

You can reach Directory Assistance by dialing 411 from your telephone. Charges apply.

Your Call is Billed Automatically

All long distance calls that are dialed direct from your telephone are automatically timed by electronic devices. These machines record your telephone number, the number you dialed, and its location. Also, the time your conversation begins and the time it ends. These calls will be billed to you by your long distance telephone provider.

Expanded Direct Distance Instructions

Dialing Long Distance

You will need to designate a long distance carrier in order to be able to complete long distance phone calls.

Dialing Person-to-Person, Collect, Credit Card and Bill to Another Number

Dial "0" (Operator).

After you have dialed the number, an operator will answer and request the details necessary to complete your call. Give the operator your special instructions as follows:

For person-to-person calls..... - say "person to person" and give the operator the name of the person you are calling.

For collect calls..... - say "collect" and give your name.

For credit card calls - say "credit card call" and give your credit card number.

For calls billed to another number - say "bill this call to..." and give the operator the number the call is to be billed to.

How to Get Out of Town Numbers

If you do not have the number of the person you would like to call, you can reach Directory Assistance by dialing 411 from your telephone. Charges apply.

Types of Long Distance Calls

Station to Station

Direct Distance Dialed (DDD) calls are station-to-station calls.

Collect (Dial Operator)

You can call “collect” if the receiving number you’re calling agrees to pay the charge. If you want to make a “collect” call, tell the Operator and give them the area code for the city you want and the seven digit number.

Conference (Dial Operator)

You can talk to several people in different places at the same time. Dial Operator and tell them you wish to make a conference call.

Mobile, Marine & Overseas Service

You can make local and long distance calls to automobiles, trucks, trains, aircraft and boats equipped for telephone service and to practically all the world’s telephones. Some mobile and marine calls can be completed by dialing, others must be completed by the Operator. On overseas calls, dial Operator and ask for the Overseas Operator and give her the name of the country you’re calling.

You Will Not Be Charged

If the telephone number you called is busy or does not answer, you will not be charged for the call. You will also not be charged for a call in which you hang up before dialing the complete number.

Area Codes

The United States and Canada are divided into more than 120 telephone areas, each identified by a three-digit area code. You will find that your Long Distance calls go through faster if you give the Operator the area code and the number. The area codes for many points are listed below. For example, just say, "Area Code 311-555-2368." If the Operator needs to know the name of the place you are calling, they will ask you for it.
